

CUNY Neuroscience Collaborative Seminar Series SPRING 2024

Friday, May 3rd, 3:00 - 4:30 PM
The CUNY Graduate Center, Rm. C-201-2

Konrad Kording,
Ph.D.,
*University of
Pennsylvania*

On obtaining causality in neuroscience

I will start building some intuition on why causality is generally difficult to assert. I will continue reviewing why causality is hard to achieve with the specific constraints of neuroscience. I will then sketch some situations where causality can be confidently asserted. Lastly, I will discuss the wide range of non-causal questions in neuroscience.

In-person

Hosts: Dr. Nesha Burghardt (nb844@hunter.cuny.edu) and Dr. Asohan Amarasingham (amarasingham@ccny.cuny.edu)
The CUNY Graduate Center, 365 5th Ave (5th Ave & 34th St.), New York, NY
